

VISION

The initiative to start BRD Public School with a vision prepares students to understand, contribute to and succeed in a rapidly changing society, thus making the world a better and more just place. We will ensure that our students develop both the skills that a sound education provides and the competencies essential for success and leadership in the emerging creative economy. We will also lead in generating practical and theoretical knowledge that enables people to better understand our world and improve conditions for local and global communities. We will be the preeminent intellectual and creative center for effective engagement in a world that increasingly demands better-designed objects, communication, systems, and organizations to meet social needs. Our vision aligns with shifts in the global economy, society, and environment, which animates our mission and our values.

MISSION

BRD Public School provides affordable and quality education to students of all strata irrespective of caste, creed, or gender. The aim will be to foster a global mindset with values deep-rooted in our Indian culture. The School is committed to instilling values of social justice, equality, knowledge, and skills by providing unlimited possibilities for every child to realize their potential and fulfil their ambitions. We will fulfill our mission by extending our School's legacy as a nontraditional School and community, nimble and responsive to change. Mission of school Focuses on and engages with critical contemporary issues and Prioritizes humanity and culture in designing systems and environments to improve the human condition, an approach that draws on design thinking and the liberal, creative, and performing arts. Our aim includes Creativity, innovation, and a desire to challenge the status quo will affect what and how we teach and the intellectual ambitions of the School itself. The New School must embrace these principles and innovate to address shifts in the global economy, society and environment that require individuals to grapple with complex problems, pursue more fluid and flexible career pathways, and collaboratively create change.
